IMC/P

- What is IMC/P?
  - The consolidation of maintenance tasks that minimizes the duplication of effort among Organizational (O), Intermediate (I), and Depot (D) levels.

IMC/P

- What is the purpose of IMC/P?
  - Improve aircraft material condition.
  - Integrate tasks across all maintenance levels.
  - Balance all aspects of the Preventive Maintenance (PM) program.
  - Increases operational life cycle and reduces out-of-service time.

IMC/P provides:

- Airframe Inspection & Evaluation of the Material Condition
- Defect Correction
- Evaluation & repair of the Aircraft Paint System
- The opportunity for the incorporation of DEPOT Level Modification and Technical Directive Compliance

IMC/P replaces:

- Modification, Corrosion, and Paint Program (MCAPP)
- Paint and Corrosion Evaluation (PACE)
- Standard Depot Level Maintenance (SDLM)
- Aircraft Service Period Adjustment (ASPA) for specific Type/Model/Series (T/M/S) aircraft.

IMC/P Sites

- 3 DEPOT plus 10 locations outside of the NADEP
- Supporting 9 different Type of aircrafts (E-2/C-2, F-18, H-1, H-46, H-53, H-60, F-14, S-3)

CONUS IMC/P SITES

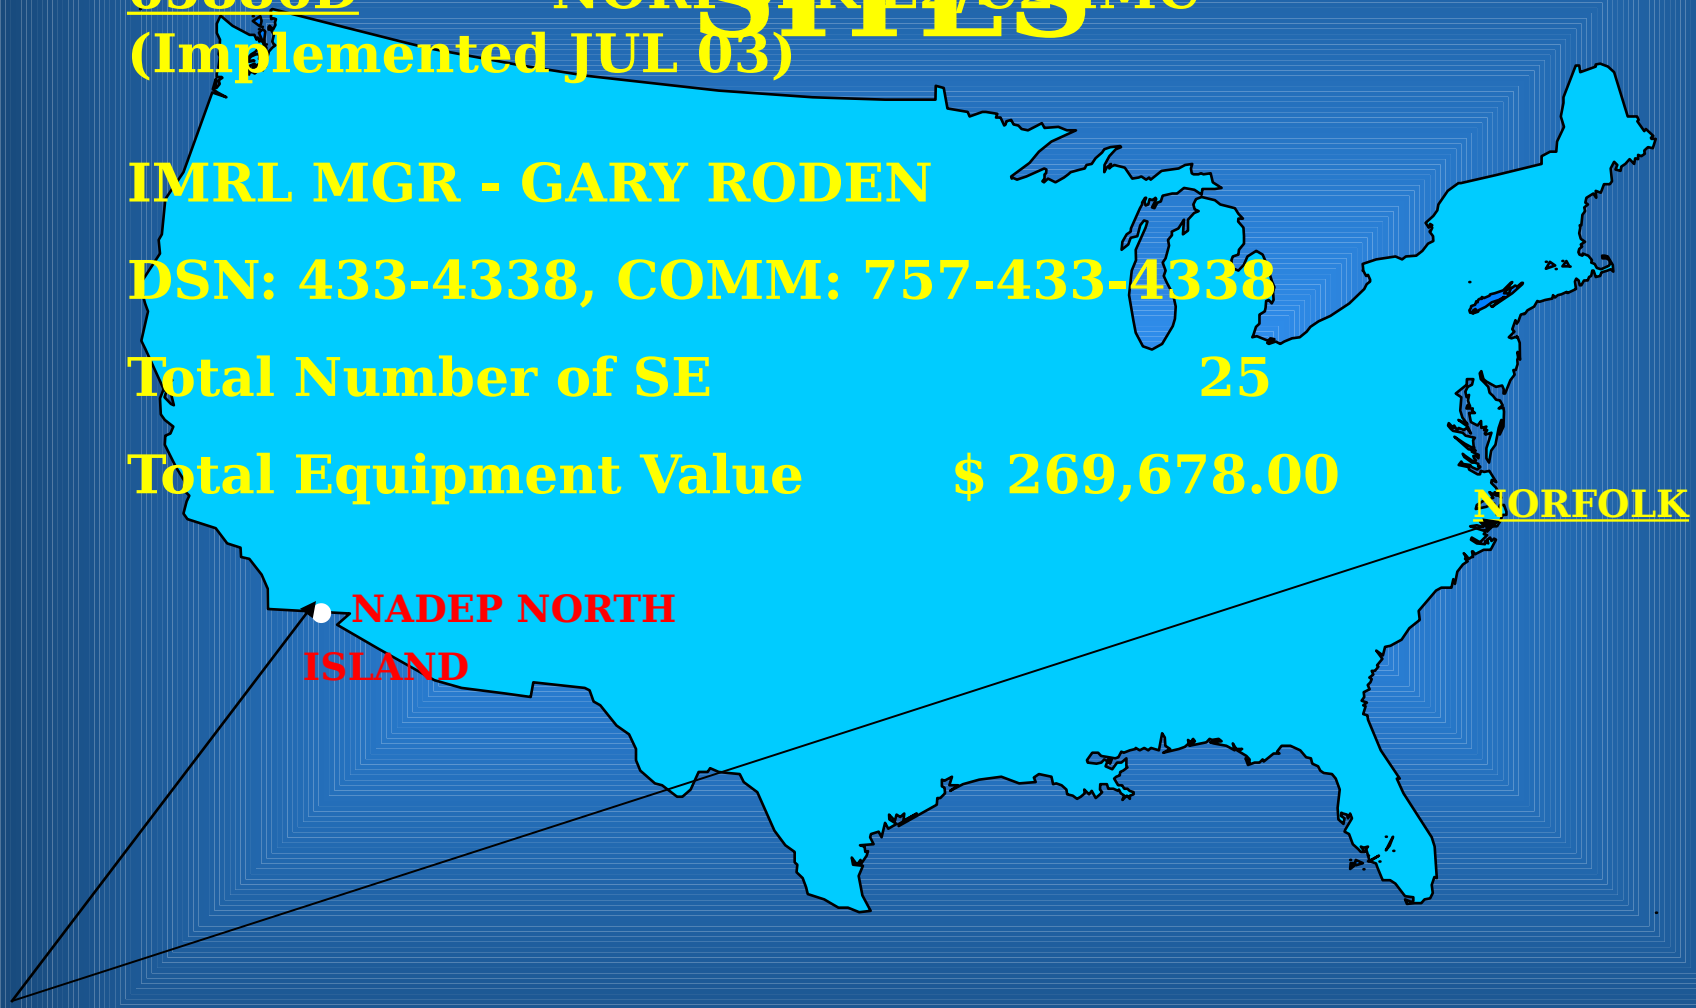
65886D - NORFOLK E-2C/C-2 IMC
(Implemented JUL 03)

IMRL MGR - GARY RODEN

DSN: 433-4338, COMM: 757-433-4338

Total Number of SE 25

Total Equipment Value $ 269,678.00



E-2C/C-2
